

# Cardinal Safety Rules

## Working at Heights

A proper means of Fall Protection must be used and all regulatory and Shaw Group rules followed when working above 3M.

## Altering a Safety Device

No removal, modification or bypassing of any safety device (guards, interlocks, etc.) is permitted without proper authorization and controls in place (Hazard Assessment or LOTOTO).

## Powered Mobile Equipment

Powered mobile equipment shall only be operated by a trained competent operator following all regulations, Shaw Group rules, applicable training, and manufacturers' operational requirements.

## Lockout Tagout Tryout

No piece of equipment shall be worked on until the piece of equipment is verified to be in a zero-energy state through a proper lockout tagout tryout process.

## Confined Space

No employee shall enter a confined space unless they are trained and deemed competent in confined space entry and all regulatory and Shaw Group confined space requirements are followed.

## Hot Work

No Hot Work shall take place in a Shaw Group location unless the work and work area is assessed safe to proceed as per the Shaw Group Hot Work process.
